

The image shows a collection of Aalto and Basalte speakers. In the foreground, there are two dark, textured rectangular speakers. Behind them, a larger speaker with a blue, woven fabric grille is visible. The background consists of a wall with a green and brown woven fabric pattern. The Aalto logo and tagline are on the left, and the Basalte logo is on the right.

Exclusive design

Aalto is a unique collection of high-performance speakers for the world's most exclusive homes. Through top-notch Belgian engineering, they beautifully blend studio quality audio with your interior design language.

Aalto speakers are characterised by their innovative, architectural build and the variety of top-quality finishes and textures that fit your living room, dining area, home office etc. Aalto can be installed in-wall, on-wall or freestanding with the cabinet's ultra slim front trim as the eye-catching golden edge.

The speaker cabinet is made of aluminium, brass, bronze or nickel, setting a new standard in speaker manufacturing. It beautifully matches your interior finishes and Basalte's line of luxury light switches. For the front cover, you can choose from a handpicked palette of top quality fabrics by Gabriel and Kvadrat from Denmark.

Exceptional sound

Aalto active speakers combine first-class technology with our high-end multiroom audio system. This comprehensive solution provides top quality audio with an unequalled ease of use, so you can enjoy your own and streamed music around the house: perfectly tuned for every space and in crystal clear quality.

The integrated amplifier (200W) perfectly matches the speaker and eliminates the need to hide separate amplifiers. This improves the listening quality, simplifies the installation and significantly reduces cable runs.

We distribute your music around the house through a networked system, transporting high-resolution 24-bit uncompressed audio over Ethernet. Use the speaker's integrated DSP settings to fine-tune each Aalto and meet your personal needs.

All speakers have an integrated Bluetooth receiver and optical audio input to easily connect a TV or other audio source and again enjoy around the house. All of this is controlled through the Basalte Home app and other controls for KNX home automation.
